#### Note 1:
Contact the college advisement center for help in outlining an efficient schedule.

#### Note 2:
Students are encouraged to complete an average of 15–16 credit hours each semester or about 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
BA in Linguistics (554920)
2019-2020 Program Requirements (53 Credit Hours)

THE DISCIPLINE:
Linguistics is the study of language in all its aspects—from speech sounds to sentence formation to meaning; from how language is organized and used in a social setting to how it is organized and processed in the brain or by computers. Linguists study language form, language change, language acquisition, and even the texts in which language is recorded. Linguists recognize that the communicative power of language is what brings cohesiveness to all human enterprises. For the student interested in the nature of language, linguistics is the subject to study.

The science of linguistics has many real-world applications—including translation, information storage/retrieval, lexicography, editing, and language teaching. In addition to its majors in general linguistics and in English language, BYU’s Department of Linguistics offers undergraduate minor programs (as well as graduate degrees) in several of these areas.

CAREER OPPORTUNITIES:
A linguistics degree with an emphasis in computers may lead to jobs in high technology, e.g., machine translation, information retrieval, speech recognition and production software, and lexicography. Linguistics is also recognized as a strong specialization for those pursuing a career in military intelligence or technical writing. The teaching of English to speakers of other languages is another applied linguistics area of high demand—both within the United States and around the world (see further description under TESOL below).

In addition, linguistics is an excellent preparatory discipline for those planning graduate studies in areas as diverse as law, international business, tourism, library science, TESOL, communicative disorders, and speech pathology, not to mention graduate studies in specific languages or in linguistics itself.

CAREER SUGGESTIONS AND STRATEGIES:
Linguistics
Possible careers: university teaching or research, translation, software development, lexicography, artificial intelligence, computer assisted instruction, defense, military, law, marketing, pre-professional preparation, national security, data analysis, technical writing and editing, government service, abstracting service, church service.
