### THE DISCIPLINE:

From its first appearance in ancient Greece down to the present, philosophy has sought to understand the world and the place of human beings within it. As it frames ideas by means of which to clarify and explain experience, philosophy discloses its faith in the ultimate lucidity of things. Philosophy’s respect for the authority of intelligence fosters a preference for persuasion that is fundamental to personal growth and democratic society. Students who study philosophy will find that it not only provides insight into life’s fundamental concerns, it also helps them develop their capacity for clear thinking and perceptive judgment. Such competence will serve them well as they pursue further education or begin their careers.

### CAREERS:

Philosophy offers excellent career preparation, but not in the way that, say, accounting does. The value of a major in philosophy resides in the intellectual development it promotes. It lays a foundation on which more specialized study may build. In various standardized tests, philosophy majors tend to do extremely well on the verbal aptitude and on the analytic thinking sections. So philosophy can prepare a student for any type of work that requires highly developed...
reading and writing skills. Students who elect to major in philosophy should look beyond their bachelor’s degree right from the start. For example, philosophy is an excellent background for the study of law or medicine. Those who intend to enter graduate school will need to start early on the foreign language requirement.

**CAREER SUGGESTIONS AND STRATEGIES:**

**Counseling** — Develop excellent verbal and written communications skills; gain related work experience; acquire master’s degree in Library Science; take counseling courses; obtain master’s degree in social work or counseling.
