SENIOR THESIS:
Complete a senior thesis, including the following:
A. Choose a research mentor and group as early as possible, starting
with information in Phscs 191 and 291, and discussion with faculty, your
advisor and senior thesis coordinator. It is best to start as a freshman or
sophomore. Interdisciplinary work in other departments or in
internships is possible.
OPTION 3.1 Complete 2.0 hours from the following course(s)
B. PHSCS 498R - Senior Thesis
You may take up to 2 credit hours.
REQUIREMENT 4
Students are required to take the Physics "Major Field Test" the last semester
before they graduate. The test is a standardized assessment of
undergraduate physics written by ETS (Educational Testing Service). The ETS
website contains a description of the exam and sample problems:
http://www.ets.org/mft/about/content/physics. Results of the exam do not
appear on the transcript or affect the GPA. Students should contact the
Physics undergraduate secretary to make arrangements for taking the exam;
typically it's done in the Testing Center before mid-semester.
Note 1: Students planning careers in experimental, applied, or industrial
physics should complete Stat 201.
Note 2: All students will benefit, through courses or individual study, by
learning programming skills and numerical methods beyond what you are
taught in C S 142 and our computational physics courses. Consider the
following: C S courses, Math 410, Me En 373.
Note 3: Students planning graduate school in physics should learn complex
analysis. Consider the following: Math 332, Phscs 601, 602.
THE DISCIPLINE:
Over the centuries physicists and astronomers have studied the
fundamental principles that govern the structure and dynamics
of matter and energy in the physical world, from subatomic
particles to the cosmos. Physicists also apply this
understanding to the development of new technologies. For example, physicists invented the first lasers and semiconductor
electronic devices.
5. Fundamental background for other physical sciences and engineering, in preparation for graduate study in these fields.
6. Physics fundamentals required by the biological science, medical, dental, nursing, and related programs.
