*THESE CLASSES FILL BOTH UNIVERSITY CORE AND PROGRAM REQUIREMENTS (7 hours overlap)*

### Graduation Requirements:

- Minimum residence hours required: 30.0
- Minimum hours needed to graduate: 120.0

### Suggested Sequence of Courses

#### FRESHMAN YEAR

**1st Semester**
- First-year Writing: 3.0
- MATH 112: 4.0
- PHSCS 145: 3.0
- PHSCS 220: 3.0
- PHSCS 230: 1.0
- PHSCS 291: 1.0
- Biological Science: 3.0
- Religion Cornerstone course: 2.0
- General Elective: 2.0

**Total Hours: 15.0**

#### 2nd Semester

- American Heritage: 3.0
- MATH 113: 4.0
- PHSCS 140: 3.0
- PHSCS 145: 2.0
- Religion Cornerstone course: 2.0
- General Elective: 2.0

**Total Hours: 16.0**

### SOPHOMORE YEAR

**3rd Semester**
- PHSCS 145: 1.0
- PHSCS 220: 1.0
- PHSCS 230: 1.0
- PHSCS 291: 1.0
- Biological Science: 3.0
- Religion Cornerstone course: 2.0
- General Elective: 2.0
- Social Science: 3.0

**Total Hours: 15.5**

**4th Semester**
- MATH 302: 4.0
- PHSCS 222: 3.0
- PHSCS 240: 2.0
- Religion Cornerstone course: 2.0
- General Elective: 2.0

**Total Hours: 14.0**

#### JUNIOR YEAR

**5th Semester**
- PHSCS 245: 2.0
- PHSCS 318: 3.0
- PHSCS 321: 3.0
- PHSCS 330: 1.0
- MATH 303: 4.0
- Religion Elective: 2.0

**Total Hours: 14.5**

**6th Semester**
- PHSCS 430: 1.0
- Applied Physics Elective 1: 3.0
- Applied Physics Elective 2: 3.0
- Arts: 3.0
- Religion Elective: 2.0
- General Elective: 3.0

**Total Hours: 15.0**

### SENIOR YEAR

**7th Semester**
- PHSCS 416: 3.0
- PHSCS 441: 3.0
- Applied Physics Elective 3: 3.0
- Civilization 1: 3.0
- Letters: 3.0
- Religion Elective: 2.0

**Total Hours: 16.0**

**8th Semester**
- PHSCS 416: 3.0
- PHSCS 442 or PHSCS 471 or EC EN 466: 3.0
- Civilization 2: 3.0
- Applied Physics elective 4: 3.0
- Global & Cultural Awareness: 3.0

**Total Hours: 15.0**

Note: Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
REQUIREMENT 4

Above. Three hours must be upper division (300-level or above); three hours must be 200-level or lower. Nine hours must be upper-division courses with an identified educational goal. Complete an additional 12 hours of electives (cannot include any lab hours).

REQUIREMENT 5

Complete 2.0 hours from the following option(s)

COMPLETE A CAPSTONE PROJECT OR SENIOR THESIS INCLUDING THE FOLLOWING:

A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 291, and discussions with faculty, your advisor, and the capstone project coordinator or senior thesis coordinator. It is best to start as a freshman or sophomore.

B. Interdisciplinary work in other departments or in internships is possible.

OPTION 1

Complete 2.0 hours from the following course(s)

PHSCS 498R - Senior Thesis

You may take up to 2 credit hours.

PHSCS 498R - Senior Thesis

You may take up to 2 credit hours.

REQUIREMENT 6

Students are required to take the Physics "Major Field Test" the last semester before they graduate. The test is a standardized assessment of undergraduate physics written by ETS (Educational Testing Service). The ETS website contains a description of the exam and sample problems:

http://www.ets.org/mft/about/content/physics. Results of the exam do not appear on the transcript or affect the GPA. Students should contact the Physics undergraduate secretary to make arrangements for taking the exam; typically it's done in the Testing Center before mid-semester.

Note 1: Students planning careers in experimental, applied, or industrial physics should complete Stat 201.

Note 2: All students will benefit, through courses or individual study, by learning programming skills and numerical methods beyond what you are taught in C S 142 and our computational physics courses. Consider the following: C5 courses, Math 410, Me En 373.

CAREER OPPORTUNITIES:

A degree in physics or physics-astronomy can provide: 1. Preparation for those who intend to enter industrial or governmental service as physicists or astronomers. 2. Education for those who intend to pursue graduate work in physics or astronomy. 3. Education in the subject matter of physics for prospective teachers of the physical sciences. 4. Undergraduate education for those who will pursue graduate work in the professions: business (e.g., an MBA), law, medicine, etc. 5. Fundamental background for other physical sciences and engineering, in preparation for graduate study in these fields. 6. Physics fundamentals required by the biological science, medical, dental, nursing, and related programs. For more information, see www.physics.byu.edu/undergraduate/careers.

THE DISCIPLINE:

Over the centuries physicists and astronomers have studied the fundamental principles that govern the structure and dynamics of matter and energy in the physical world, from subatomic particles to the cosmos. Physicists also apply this understanding to the development of new technologies. For example, physicists invented the first lasers and semiconductor electronic devices. Physics and astronomy students learn to approach complex problems in science and technology from a broad background in mechanics, electricity and magnetism, statistical and thermal physics, quantum mechanics, relativity, and optics. The tools students develop at BYU include problem solving by mathematical and computational modeling, as well as experimental discovery and analysis. All students gain professional experience in a research, capstone, or internship project, usually in close association with faculty. Together these experiences can provide excellent preparation for employment or for graduate studies in physics, other sciences, engineering, medicine, law, or business. Most physicists and astronomers work in research and development in industrial, government, or university labs to solve new problems in technology and science. They also share the beauty discovered in our physical universe by teaching in high schools, colleges, and universities.

MAP DISCLAIMER

While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
