Physicists also apply this understanding to the development of new technologies. For examples, physicists invented the first lasers and semiconductor electronic devices.</p> <p>Physics and astronomy students learn to approach complex problems in science and technology from a broad background in mechanics, electricity and magnetism, statistical and thermal physics, quantum mechanics, relativity, and optics. The tools they develop at BYU include problem solving by mathematical and computational modeling, as well as experimental discovery and analysis. All students gain professional experience in a research, capstone, or internship project, usually in close association with faculty. Together these experience can provide excellent preparation for employment of for graduate studies in physics, other sciences, engineering, medicine, law, or business.</p>	PHSCS 498R - Senior Thesis	3.0v	<p>Most physicists and astronomers work in research and development in industrial, government, or university labs to solve new problems in technology and science. They also share the beauty discovered in our physical universe by teaching in high schools, colleges, and universities.</p> <p><b>CAREER OPPORTUNITIES:</b></p> <p>A degree in physics or physics-astronomy can provide:</p> <ol style="list-style-type: none"> <li>1. Preparation for those who intend to enter industrial or governmental service as physicists or astronomers.</li> <li>2. Education for those who intend to pursue graduate work in physics or astronomy.</li> <li>3. Education in the subject matter of physics for prospective teachers of the physical sciences.</li> <li>4. Undergraduate education for those who will pursue graduate work in the professions: business (e.g., an MBA), law, medicine, etc.</li> <li>5. Fundamental background for other physical sciences and engineering, in preparation for graduate study in these fields.</li> <li>6. Physics fundamentals required by the biological science, medical, dental, nursing, and related programs.</li> </ol> <p>For more information, see <a href="http://physics.byu.edu/undergraduate/careers">physics.byu.edu/undergraduate/careers</a>.</p> <p><b>MAP DISCLAIMER</b></p> <p>While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements.
