</table>

Note: Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

Graduation Requirements:

- Minimum residence hours required: 30.0
- Minimum hours needed to graduate: 120.0

BS in Physics--Astronomy (694832) MAP Sheet

Physical and Mathematical Sciences, Physics and Astronomy

For students entering the degree program during the 2017-2018 curricular year.
BS in Physics--Astronomy (694832)
2017-2018 Program Requirements (67 - 70 Credit Hours)

No more than 3 hours of D credit is allowed in major courses.

REQUIREMENT 1 Complete 1 option

OPTION 1.1 Complete 19 courses
- C S 142 - Introduction to Computer Programming 3.0
- PHSCS 121 - Introduction to Newtonian Mechanics 3.0
- PHSCS 123 - Introduction to Waves, Optics, and Thermodynamics 3.0
- PHSCS 127 - Descriptive Astronomy 3.0
- PHSCS 191 - Introduction to Physics Careers and Research 1 0.5
- PHSCS 220 - Introduction to Electricity and Magnetism 3.0
- PHSCS 222 - Modern Physics 3.0
- PHSCS 227 - Solar System Astronomy 3.0
- PHSCS 228 - Stellar and Extragalactic Astronomy 3.0
- PHSCS 230 - Computational Physics Lab 1 1.0
- PHSCS 291 - Introduction to Physics Careers and Research 2 0.5
- PHSCS 318 - Introduction to Mathematical Physics 3.0
- PHSCS 321 - Mechanics 3.0
- PHSCS 329 - Observational Astronomy 3.0
- PHSCS 330 - Computational Physics Lab 2 1.0
- PHSCS 427 - Introduction to Astrophysics 3.0
- PHSCS 428 - Introduction to Astrophysics 3.0
- PHSCS 441 - Electrostatics and Magnetism 3.0
- PHSCS 451 - Quantum Mechanics 3.0

Note: Phscs 191 should be taken the first semester as a freshman. Phscs 291 should be taken the first semester as a sophomore.

REQUIREMENT 2 Complete 2 courses
- PHSCS 360 - Statistical and Thermal Physics 3.0
- PHSCS 442 - Applications of Quantum Mechanics 3.0
- PHSCS 452 - Principles of Optics 3.0
- PHSCS 471 - Principles of Several Variables 3.0

REQUIREMENT 3 Complete 1 option

OPTION 3.1 Complete 2 courses
- *MATH 113 - Calculus 1 4.0
- MATH 114 - Calculus 2 4.0

OPTION 3.2 Complete 3 courses
- *MATH 113 - Calculus 1 4.0
- MATH 313 - Elementary Linear Algebra 3.0
- MATH 314 - Calculus of Several Variables 3.0

REQUIREMENT 4 Complete 1 course
- MATH 302 - Mathematics for Engineering 2 4.0
- MATH 334 - Ordinary Differential Equations 3.0

REQUIREMENT 5 Complete 1 option

SENIOR THESIS:
Complete a senior thesis, including the following:
A. Choose a research mentor and group as early as possible, starting with information in Phscs 191 and 192, and discussions with faculty, your advisor, and the senior thesis coordinator. It is best to start as a freshman or sophomore. Some internships may qualify for your project.

OPTION 5.1 Complete 2.0 hours from the following course(s)
- PHSCS 498R - Senior Thesis 3.0

You may take up to 2 credit hours.

REQUIREMENT 6
Complete the Physics Major Field Test the last semester before graduation.

Note: Students planning on graduate school in astronomy should consider taking all four of Phscs 360, 442, 452, 471, instead of only two. Gain statistics and computer programming skills beyond what you get in this major by taking courses such as Stat 201 (Statistics for Engineers and Scientists) and courses such as Phscs 430 (Computational Physics 3) and Me En 373 (Introduction to Scientific Computing).

THE DISCIPLINE:
Over the centuries physicists and astronomers have studied the fundamental principles that govern the structure and dynamics of matter and energy in the physical world, from subatomic particles to the cosmos. Physicists also apply this understanding to the development of new technologies. For examples, physicists invented the first lasers and semiconductor electronic devices.

Physics and astronomy students learn to approach complex problems in science and technology from a broad background in mechanics, electricity and magnetism, statistical and thermophysical, quantum mechanics, relativity, and optics. The tools they develop at BYU include problem solving by mathematical and computational modeling, as well as experimental discovery and analysis. All students gain professional experience in a research, capstone, or internship project, usually in close association with faculty. Together these experience can provide excellent preparation for employment of for graduate studies in physics, other sciences, engineering, medicine, law, or business.

Most physicists and astronomers work in research and development in industrial, government, or university labs to solve new problems in technology and science. They also share the beauty discovered in our physical universe by teaching in high schools, colleges, and universities.

CAREER OPPORTUNITIES:
A degree in physics or physics-astronomy can provide:
1. Preparation for those who intend to enter industrial or governmental service as physicists or astronomers.
2. Education for those who intend to pursue graduate work in physics or astronomy.
3. Education in the subject matter of physics for prospective teachers of the physical sciences.
4. Undergraduate education for those who will pursue graduate work in the professions: business (e.g., an MBA), law, medicine, etc.
5. Fundamental background for other physical sciences and engineering, in preparation for graduate study in these fields.
6. Physics fundamentals required by the biological science, medical, dental, nursing, and related programs.

For more information, see physics.byu.edu/undergraduate/careers.

MAP DISCLAIMER
While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
