**THE DISCIPLINE**

Therapeutic recreation students learn how to use recreation as a treatment modality to help people with illnesses and disabilities improve functional behavior, develop skills and abilities related to leisure and wellbeing, and improve quality of life. They accomplish this through therapeutic interventions using arts and crafts, outdoor recreation, sports, games, dance, drama, music, or community outings. Therapists also help integrate people with disabilities into society by teaching them how to use community resources and recreational activities. The foundational business courses provided in the Therapeutic Recreation program prepare our students for upward mobility into leadership positions, providing a unique competitive advantage over other programs across the country.

**CAREER OPPORTUNITIES**

Graduates of the TR program are eligible for national certification and state licensure as recreation therapists. They work in a variety of settings, including centers for physical rehabilitation, behavioral and emotional residential treatment, eating disorders, drug and alcohol rehabilitation, adaptive sports, and assisted living. They also work in spinal cord and head injury accredited facilities, corrections, wilderness and adventure therapy programs, parks and recreation programs, schools, community centers, long-term care facilities, youth programs, community-based recreation programs for people with disabilities, and other centers.
