Upper-division courses require synthesis and integration of information from many areas of science to allow understanding of such processes as protein folding, function of ion channels, and how the nervous system works.</p> <p>CAREER OPPORTUNITIES:</p> <p>A major in biophysics prepares students to pursue advanced degrees</p>	<p>in the biological sciences. This major also provides outstanding preparation for students seeking admittance into professional programs. Graduates of this program will also have the academic and laboratory skills necessary for direct employment in medical, biotechnological, and pharmaceutical industries. Biophysicists whose primary interest is research often work in government agencies, such as the National Institutes of Health, NASA, and the Departments of Agriculture or Defense. Many new positions have been created in industry as a result of recent developments in molecular biophysics and molecular biology. Regardless of the setting, biophysicists generally work in groups with people with different backgrounds, interests, and abilities who collaborate to solve common problems.</p> <p>RESEARCH OPPORTUNITIES:</p> <p>Students majoring in biophysics have the opportunity to become involved in laboratory research with the faculty. Funding for this research comes from such sources as the National Institutes of Health, and National Science Foundation. Research topics such as the following are being investigated:</p> <ul style="list-style-type: none"> • Molecular modeling and regulation of voltage-gated ion channels. • Biophysics of membrane structure and function. • Molecular and functional characterization of ligand-gated ion channels in the central nervous system. • Molecular mechanisms of neurotransmitter release. <p>MENTORED EXPERIENCE:</p> <p>A mentored experience involves working closely with a faculty member doing research in biophysics (PDBio 494R and 495R).</p> <p>FINANCING:</p> <p>Various private, federal, and university sources of scholarships, fellowships, and grants are available. Advanced undergraduates may be hired to teach labs or help sections for PDBio courses.</p> <p>Please see the Life Sciences Advisement Center (2060 LSB) for information regarding College and Department Scholarship Requests.</p>
