**Note:** The department recommends a review of progress and planned registration with a faculty advisor by the end of the first week of classes in the first semester or term by BYU and in the semester when 30, 60, and 90 hours are completed. Call 422-6269 or come to C104 BNSN to schedule an appointment. New incoming students should attend the chemistry and biochemistry session during New Student Orientation, where they can meet with a faculty advisor and review their planned registration.

**Note:** Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
BS in Biochemistry (692826)
2017-2018 Program Requirements (77 Credit Hours)

No more than 3 hours of D credit is allowed in major courses.
The Chemistry and Biochemistry Department requires the final 10 hours of
required chemistry credit to be taken in residence at BYU for this degree
program. These hours may also go toward BYU’s 30-hour residency
requirement for graduation.

REQUIREMENT 1 Complete 17 courses
NOTE: WITH DEPARTMENT APPROVAL CHEM 105 MAY SUBSTITUTE FOR
CHEM 111; AND CHEM 106 FOR CHEM 112.
CHEM 111 - Principles of Chemistry 1 4.0
CHEM 112 - Principles of Chemistry 2 3.0
CHEM 113 - Introductory General Chemistry Laboratory 2.0
CHEM 201 - Chemical Handling and Safe Laboratory Practices 0.5
CHEM 227 - Principles of Chemical Analysis 4.0
CHEM 351M - Organic Chemistry 1 - Majors 3.0
CHEM 352M - Organic Chemistry 2 - Majors 3.0
CHEM 354 - Organic Chemistry Laboratory—Majors 2.0
*CHEM 391 - Technical Writing Using Chemical Literature 3.0
CHEM 468 - Biophysical Chemistry 3.0
*CHEM 481M - Biochemistry—Majors 3.0
CHEM 482 - Mechanisms of Molecular Biology 3.0
CHEM 489 - Structural Biochemistry 3.0
CHEM 495 - Senior Seminar 1.0
CHEM 584 - Advanced Biochemistry Methods 1 3.0
CHEM 586 - Advanced Biochemistry Methods 2 3.0
CHEM 594R - General Seminar 0.5

You may take this course up to 1 time.

REQUIREMENT 2 Complete 8 courses
BIO 130 - Biology 4.0
MATH 112 - Calculus 1 4.0
MATH 113 - Calculus 2 4.0
PHSCS 121 - Introduction to Newtonian Mechanics 3.0
PHSCS 123 - Introduction to Waves, Optics, and Thermodynamics 3.0
PHSCS 220 - Introduction to Electricity and Magnetism 3.0
PWS 340 - Genetics 3.0
STAT 201 - Statistics for Engineers and Scientists 3.0

You may take this course up to 1 time.

Recommended Courses: Chem 195; Math 302 or Math 313.

Note: Supporting courses suggested by most medical and dental schools are
found by visiting the Preprofessional Advisement Office. The more rigorous
chemistry, mathematics, and physics courses required for the chemistry
majors will satisfy the minimum requirements listed there. Elective courses
in biochemistry and in biological science are especially pertinent to these
preprofessional programs.

REQUIREMENT 3 Complete 1 course
MMbio 463 - Immunology 3.0
MMbio 465 - Virology 3.0
MMbio 468 - (MMBio-Bio-PWS) Genomics 3.0
PDBIO 360 - Cell Biology 3.0

PDBIO 362 - Advanced Physiology 3.0

REQUIREMENT 4 Complete 3.0 hours from the following course(s)
AFTER CONSULTING WITH AN ADVISOR, COMPLETE 3 HOURS FROM THE
FOLLOWING. NOTE: WITH PRIOR APPROVAL, MANY 300-LEVEL AND ABOVE
COURSES IN BIOLOGY, INTEGRATIVE BIOLOGY, MICROBIOLOGY AND
MOLECULAR BIOLOGY, AND PHYSIOLOGY AND DEVELOPMENTAL BIOLOGY
WILL FILL THIS REQUIREMENT. CHEM 500 DOES NOT COUNT TOWARD
FULFILLING THIS REQUIREMENT.
CHEM 455 - Synthesis and Qualitative Organic Analysis 3.0
CHEM 496R - Academic Internship: Chemistry and Biochemistry
You may take up to 4 credit hours.
CHEM 497R - Undergraduate Special Problems 6.0v
You may take up to 4 credit hours.
CHEM 499R - Honors Thesis 6.0v
You may take up to 4 credit hours.
CHEM 514 - Inorganic Chemistry 3.0
CHEM 518 - Advanced Inorganic Laboratory 2.0
CHEM 521 - Instrumental Analysis Lecture 2.0
CHEM 523 - Instrumental Analysis Laboratory 2.0
CHEM 552 - Advanced Organic Chemistry 3.0
CHEM 553 - Advanced Organic Chemistry 3.0
CHEM 563 - Reaction Kinetics 3.0
CHEM 565 - Introduction to Quantum Chemistry 3.0
CHEM 567 - Statistical Mechanics 3.0
CHEM 569 - Fundamentals of Spectroscopy 3.0
CHEM 581 - Advanced Biochemical Methodology 1 3.0
CHEM 583 - Advanced Biochemical Methodology 2 3.0
CHEM 596R - Special Topics in Chemistry 3.0v
You may take up to 4 credit hours.

THE DISCIPLINE
The Biochemistry Bachelor of Science degree provides excellent
preparation for students preparing for health-related fields
(medicine, dentistry, veterinary medicine) or for those who
 Desire an advanced degree (MS or PhD) in biochemistry,
molecular biology, or the health sciences. Chemists and
biochemists study the fundamental processes that govern the
natural world, including atomic structure and how atoms
interact to form molecules and materials. They study the
mechanisms of chemical processes, including those that
underpin living systems such as the transfer of information
from DNA to RNA to proteins. They work to develop simplifying
models/theories that permit the correlation and explanation of
observations about the behavior of life to the structure of rocks
and minerals.

Chemistry and biochemistry provide an essential foundation for
the medical sciences, engineering (especially chemical
engineering), electronics, energy, environmental sciences,
materials science, pharmacy, and virtually all manufacturing
processes.

Chemistry and biochemistry are active branches of science that are
vital to human existence. Inasmuch as the field embraces all
aspects of the material world, it is subdivided into five areas of
interest. Examples of these diverse areas include the regulation
of protein synthesis, cellular signal transduction at the
molecular level and proteomics (biochemistry), design and
synthesis of medicinal compounds, catalysts and polymers
(organic chemistry), design and synthesis of new molecular
structures and materials (inorganic chemistry), spectroscopic
study of energy transfer and molecular structures (physical
chemistry), and analysis of medicinal compounds, biological
materials, and contaminants or trace elements found in the
environment (analytical chemistry).

Chemistry and biochemistry involve far more than test tubes
and beakers. They include sophisticated methodologies such as
recombinant DNA technology, working with a variety of
instruments such as mass spectrometers, calorimeters,
chromatographs, ultracentrifuges, lasers, X-ray diffractometers,
electron microscopes and nuclear magnetic resonance
spectrometers, all of which are used by undergraduate
chemistry and biochemistry students at BYU. Computers also
play an important role in these disciplines, with applications
ranging from simulation of molecules and their interactions to
the collection and analysis of data. The chemistry and
biochemistry curricula are both rigorous and intellectually
rewarding.

CAREER OPPORTUNITIES:
Graduates in chemistry and biochemistry obtain positions in
education and many different industries, performing analysis,
characterization, observation, and modeling. Those who work hard, are creative, and have intellectual curiosity are in particular demand. The discipline also provides an excellent preprofessional course of study for those interested in medicine, dentistry, law, and business.

**MAP DISCLAIMER**

While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
