Note 1: The sequence of courses suggested may not fit the circumstances of every student. Students should contact their college advisement center for help in outlining an efficient schedule.

Note 2: Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
No more than 3 hours of credit below C- is allowed in major courses.

Students must pass one exam of the Society of Actuaries (SOA), usually Exam FM, before declaring an actuarial science major.

**Recommended Courses:** It is recommended that students take Econ 110 and Fin 201 to complete the Society of Actuaries Economics and Corporate Finance VEEs. Additionally, IS 515 and IS 520 are exceptionally valuable in the daily work of an actuary.

**THE DISCIPLINE:**
An actuary is a statistician who analyzes the financial consequences of risk. Actuaries use statistics, mathematics, and financial theory to study uncertain future events, especially those of concern to insurance and pension programs. They evaluate the likelihood of those events and design creative ways to reduce the likelihood and decrease the impact of adverse events that do occur. Their work designing and managing programs that control risk requires a combination of strong analytical skills, business knowledge, and understanding of human behavior.

**CAREER OPPORTUNITIES:**
Actuaries enjoy excellent job security, high incomes, and a low-stress work environment. Careers in actuarial science are consistently ranked among the top three professions. Competent actuaries are highly recruited and can have many professional opportunities.
Economics VEE: Econ 110
