Most applicants apply to the Marriott School the summer before their junior year. Deadline to apply for Fall is the last working day of Jun by 4:30 pm. Each program starts at the beginning of a new academic year.

**Note:** The sequence of courses suggested may not fit the circumstances of every student. Students should contact their advisement center for help in outlining an efficient schedule.

**Note:** This major requires a minimum of 120 hours for graduation. Students are encouraged to complete an average of 15–16 credit hours each semester or 30–31 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

THE DISCIPLINE:
Courses are designed to create opportunities for students to develop and apply their analytical and decision-making abilities. For this reason, Marriott School programs make extensive use of faculty expertise, case studies, student projects, and internships. Computer-based information systems have become a critical part of the products, services, operations, and management of all organizations. The effective and efficient use of information and communications technologies is an important element in achieving competitive advantage for business organizations as well as achieving excellence in service for government and non-profit organizations. The twenty-first century has seen the rapid growth of the Internet, eCommerce, and purely electronic enterprises. These organizations would not even exist without the technology provided by computer-based information systems. The importance of information systems to organizations and the need for well-educated professionals in the field is the basis for strong educational programs and the development of a professional community of information systems (IS) practitioners.

Information systems involves two broad areas: (1) the acquisition, deployment, and management of an organization’s information systems resources and services; and (2) the development of computer based systems and technology infrastructures for use in organization processes. Information systems professionals provide services ranging from the managerial to the highly technical. Information systems and technology skills are critical to the success of virtually all modern organizations, including small business, corporations, and educational institutions.

CAREER OPPORTUNITIES:
Information systems graduates work in large and small organizations of all types, helping maintain existing technology infrastructure and specifying technology solutions to business needs. They serve as the bridge between an organization’s technical personnel and its business side. Well educated information systems graduates are in high demand in accounting firms, technical companies, government agencies, and smaller entrepreneurial concerns. Challenging career opportunities embrace a wide range of interests. The variety of employment prospects includes opportunities for those who are primarily interested in people and organizations to those who enjoy very technical activities such as database and network administration or software development.

GENERAL INFORMATION
Students are encouraged to apply to the Marriott School of Management before their junior year, as soon as they have completed the prerequisite courses.

Marriott School majors are limited-enrollment programs and the application process is competitive. For assistance in preparing for the application process, it is highly recommended that students visit the Marriott School Advisement Center.

REQUIREMENTS FOR APPLICATION:
All new students entering the Marriott School commence their study at the beginning of Fall semester. Admission into the Marriott School is based on consideration of the following:
- GPA in prerequisite courses
- 500 word essay
- Resume
- A review of the overall academic record
Prerequisite courses must be completed before the application deadline. Any application with a prerequisite GPA below a 3.0 will not be considered. When prerequisite GPA is calculated, repeated or transferred courses will be discounted. See the Marriott School Advisement Center for more information.

TRANSFER INFORMATION:
No more than 12 credit hours of upper-division transfer credit will be accepted toward the major, and only 6 hours beyond the management core. Transfer equivalencies for the following courses will not be considered: IS 201, IS 303, M Com 320.

BS Information Systems, Concurrent with MISM:
The MISM program has a five-year integrated option for BYU students in the undergraduate information systems program, as well as an option for students who have already completed a bachelor’s degree. The first year of the undergraduate program must be completed with a minimum 3.0 GPA to be eligible to apply for admission into the Master of Information Systems Management program. Meeting the minimum requirements does not guarantee admission.
