*These courses fill both University Core and Program Requirements (6 hours overlap)

### Graduation Requirements:

- Minimum residence hours required: 30.0
- Minimum hours needed to graduate: 120.0

## Suggested Sequence of Courses

### FRESHMAN YEAR

**1st Semester**
- 1st Year Writing OR A HTG 100
- Religion Cornerstone course
- Arts or Letters elective
- Global & Cultural Awareness elective
- General elective
- Total Hours: 17.0

**2nd Semester**
- 1st Year Writing OR A HTG 100
- HLTH 312
- HLTH 313
- Religion Cornerstone course
- STAT 121 (Languages of Learning)
- General elective
- Total Hours: 15.0

### SOPHOMORE YEAR

**3rd Semester**
- HLTH 314
- Civilization 2 elective
- Social Science elective
- Religion Cornerstone course
- Total Hours: 15.0

**4th Semester**
- HLTH 315
- HLTH 316
- Major elective
- Religion Cornerstone elective
- General elective
- Total Hours: 15.0

### JUNIOR YEAR

**5th Semester**
- HLTH 440**
- Major elective
- MMBIO 221
- General elective
- Total Hours: 16.0

**6th Semester**
- HLTH 447**
- Major elective
- PDBIO 210 or 220
- Adv. Written & Oral Communication elective
- Religion elective
- General elective
- Total Hours: 15.0

### SENIOR YEAR

**7th Semester**
- HLTH 449***
- Major elective
- PDBIO 210 or 220
- Adv. Written & Oral Communication elective
- Religion elective
- General elective
- Total Hours: 12.0

**8th Semester**
- HLTH 493***
- Major elective
- General electives
- Total Hours: 6.0

Prior to taking HLTH 493, the student must complete HLTH 210, 313, 314, 325, 345, 440, 447, 449.

- * Offered WINTER only
- ** Offered FALL/WINTER only (not Spring/Summer)
- *** Offered FALL only

**Note:** Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.
BS in Public Health: Epidemiology (662543)  
2020-2021 Program Requirements (60 - 61 Credit Hours)

**REQUIREMENT 1** Complete 1 course
HLTH 300 - (Not currently offered)

**REQUIREMENT 2** Complete 1 course
HLTH 210 - Foundations of Public Health 3.0

**REQUIREMENT 3** Complete 1 course
HLTH 310 - (Not currently offered)
HLTH 314 - Health, Disease and Their Determinants, Part 1 3.0

**REQUIREMENT 4** Complete 1 course
HLTH 315 - Health, Disease and Their Determinants, Part 2 3.0

**REQUIREMENT 5** Complete 9 courses

**NOTE:** PRIOR TO TAKING HLTH 493, THE STUDENT MUST COMPLETE HLTH 210, 313, 314, 315, 345, 440, 447, 449.

**NOTE:** IF YOU HAVE COMPLETED EITHER HLTH 441 OR HLTH 443, DISCUSS SUBSTITUTION OPTIONS WITH AN ADVISOR.

**RECOMMENDED**
WRTG 315 - Writing in the Social Sciences 3.0  
WRTG 316 - Technical Communication 3.0  
Math 112, 113 are recommended for students who want a firm foundation in calculus and/or plan to pursue graduate education.

**THE DISCIPLINE:**
Public health professionals work to create conditions that ensure the health and safety of individuals, families, and communities. Public health students are trained to inform, educate, and empower people about health issues; mobilize communities to take ownership for their own health; monitor health status and diagnose and investigate health problems and health hazards; develop policies and laws to protect health and ensure safety; and link people to needed health services. The public health mission is carried out through interdisciplinary efforts that address the physical, mental, and environmental health concerns of communities and populations at risk for disease and injury.

Four of several disciplines within public health are represented as emphases within the major: (1) the environmental/occupational health emphasis trains students to identify and control factors in the environment (air, water, food, toxins, etc.) or conditions at the workplace which affect health; (2) the epidemiology emphasis prepares students to investigate and discover what causes disease and disability and how diseases are spread or distributed across populations; (3) health promotion emphasis students are prepared to facilitate health behavior change among individuals and improve population health through policy, advocacy, education, and communication; and (4) the health science emphasis provides students with a strong public health foundation in the integration of public health with primary care and with other sectors, in cultural competency and health systems, health-related data analysis, and in upstream approaches to health inequities, particularly in vulnerable and diverse populations. Health science students pursue advanced degrees in medicine, dentistry, physician assistantship, or other allied health areas.

Epidemiologists are interested in understanding the distribution and determinants of disease, disability and other health related- events. Epidemiologists may be involved in planning and carrying out investigations or research studies to understand how disease or disability are distributed by person, place, and time factors and to identify genetic, behavioral, social, and environmental factors that either contribute to or prevent disease or disability. Epidemiologic investigations use data from surveys, interviews, and/or examinations to help answer these questions. As such, epidemiologists will spend time preparing and analyzing data to answer questions about disease distribution and determinants and communicating those results verbally and in writing.

**CAREER OPPORTUNITIES:**
Public health is an exciting field of study and a diverse and dynamic profession. It is filled with rewards associated with the pursuit of serving others. The development and delivery of population-based prevention programs will be the key to major advances in health improvement in the 21st century. Public health will continue to be called upon to monitor and assess health problems, prevent and control diseases and injuries, and protect the health of communities and workforces from various environmental and occupational risks associated with man-made and natural disasters and emergencies. With the appropriate practice experiences, public health graduates have increased qualifications to work in governmental health agencies on the local and state level. Those wishing to work specifically
in epidemiology generally require a master’s degree. Likewise, jobs at the federal government and international levels often require work experience and a graduate degree. Private-sector employment can be found in a variety of businesses, community health agencies, managed care organizations, hospitals, clinics, research institutes, voluntary health agencies, and non-governmental organizations.

Opportunities for employment in public health are available, but recruiters will not typically come to campus to hire graduates. This means graduates must be organized and proactive in their career planning. Students can increase the likelihood of obtaining a position by balancing classroom activities with voluntary or paid service to public health agencies. For epidemiology students, gaining experience with statistical methods and software applications may be particularly beneficial for success in finding entry-level positions.

While there are many specialties or disciplines in public health, most career opportunities are found in the tracks associated with the major. The skills acquired in the epidemiology emphasis can be applied in general public health jobs with widely variable salaries ranging from approximately $35,000–$60,00. Compensation will vary significantly depending upon the specific discipline, type of organization, and geographic location. However, entry-level salaries with a master’s degree in epidemiology will range from approximately $45,000–$70,00 while those with more experience or a doctoral degree may earn more. More specific details about pay and careers in epidemiology can be found at https://www.bls.gov/ooh/life-physical-and-social-science/epidemiologists.htm#tab-5.

For more information on careers in your major, please refer to From Major to Career, a publication which is located in all college advisement centers.
