THE DISCIPLINE:
Special Education is an important teaching discipline that emphasizes assessment, classification, and teaching to optimize the potential of students with disabilities. The undergraduate program prepares competent and moral educators who select, implement, and evaluate research-based effective teaching practices and appropriate curriculum for learners with special needs. Two areas of emphasis are available within the undergraduate program: students with mild/moderate disabilities and students with severe disabilities.

CAREER OPPORTUNITIES:
A degree in Special Education leads to opportunities for teaching students with individualized educational needs. Graduates in the major are licensed and qualified to teach grades K-12 in public and private schools in Utah. Teaching job opportunities are available in many states through reciprocal agreements based upon national accreditation. An ongoing lack of qualified special education teachers provides abundant career opportunities. Graduates are well positioned to pursue advanced degrees in order to advance into educational leadership positions at the school, district or state level.
