#### REQUIREMENT 10 Complete department packet and exit interview.

### THE DISCIPLINE:

Facility management is the development and management of all types of real estate, facilities, and properties from original design ideas through the life-cycle of the property. This emphasis prepares students to manage: green/sustainable facilities, commercial/multi-family properties; owner/occupant relations. Graduates combine leadership, financial, real estate investment, facilities and construction knowledge.

### ACADEMIC QUALITY:

- Facilities - The program offers a modern and attractive computer facility. It also capitalizes upon the broad expertise of University faculty and integrates course work from several other departments, and the University Physical Plant.
- Special programs - The program enjoys close coordination and cooperation with the national award winning physical plant division of the University. A variety of, internships, and special-problem activities can be arranged to augment the experience.
- Faculty expertise - The program faculty are internationally recognized and have won several national awards. Because of the broad scope of the program, it incorporates course work from several disciplines and integrates the expertise of University faculty, notably in areas such as the nationally renowned Marriott School of Business and award winning faculty in Construction Management.
- Students enjoy a close advisory relationship with the program coordinator.

### PROFESSIONAL AND HONOR SOCIETIES:

The department sponsors student chapters of the International Facilities Management Association and the Association of Physical Plant Administrators.

### INTERNSHIP EXPERIENCES:

Internships, education and practical experience are all available and are incorporated into the program. There are a variety of internships opportunities through BYU’s physical plant operation as well as with public and private industry.

### FINANCING:

Limited scholarships are available. However, the student is able to earn a portion of educational expenses through cooperative education and internships, especially in the later portion of the program.

### CAREER OPPORTUNITIES:
The program has had great placement within the construction and facilities industry. Graduates find employment in a variety of construction and facilities industry related positions. Typical position titles for the construction emphasis are project engineer, estimator, superintendent, scheduler, general contractor, safety engineer, project manager, project controller, site analyst, etc. Facilities managers are commonly employed by educational institutions, government agencies, manufacturing facilities, health care networks, sports and entertainment entities, real estate brokerage and property management, and all types of general businesses. Alumni find they are qualified for employment in all types of construction and facilities management and related industries. Graduates are prepared to further their education in architecture, business administration, construction management, facility and property management, law, public administration, and real estate.

**GRADUATE SCHOOL:**
There are graduate programs available in Public Administration, Business Administration, Engineering, Construction Management, or other related fields at a number of universities. In most cases the employer will sponsor additional required education.

**MAP DISCLAIMER**
While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
